EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2024-2028	Bachelor of Technology (Computer Science and AI)	Newton School Of Technology, Rishihood University	7.0/10.0
2022-2023	Intermediate (Class XII)	Montfort Academy	73.2%
2020-2021	Matriculation (Class X)	Saint Joseph's School	85.6%

INTERNSHIPS

Backend Developer Intern June 2026 - August 2026
PrivateVault AI *Remote*

- Built **backend services in Python and FastAPI**, developing REST APIs on **SQL databases** for core web application features.
- Debugged **production issues**, resolved software defects and **optimized application performance** through troubleshooting.

Full Stack Developer Intern May 2026 - October 2026
Bizowl (White Sense Pvt. Ltd.) *Remote*

- Owned full-stack development across **4 production apps**, shipping **50+ merged PRs** for **1,000+ users** using React and Node.js.
- **Migrated** 3 product areas from **React/Firebase to Next.js, TypeScript and MongoDB**, writing the data migration scripts.
- Fixed a **Razorpay secret key leaking to the browser**, **booking emails broken for 9+ months**, and login/session bugs.
- Used **AI coding tools** daily, reviewing every change myself, and covered booking edge cases with **Jest and Supertest** tests.

PROJECTS

Bizowl Founder Membership – Payments & Subscription Platform (Github) (Demo) September 2026

- Built Bizowl's first **paid membership** for **1,000+ users**; **10+ founders bought on launch day**, earning **Rs.50,000**.
- Made every payment count once using **Razorpay signed webhooks**, a **reconciliation cron** and **idempotent transactions**.
- Engineered **race-free session booking** with per-slot locks, plus email and calendar invites through **BullMQ, Redis and Brevo**.
- Built an investor-facing **Startup Directory** with search, sector and stage filters, SEO pages and rate-limited introductions.

StaySync (Github) (Demo) January 2026

- Built a **hostel management platform** with **10+ modules** for room allocation, QR gate passes, complaints and attendance.
- Developed backend services using **Next.js, Node.js, Express.js and MongoDB** with JWT authentication and RBAC.
- Integrated **Redis caching, Razorpay payments and REST APIs**, with automated notifications for students and hostel staff.
- Reduced administrative effort by **85%** through automated workflows and secure access control.

QuickKart AI – Region-Aware Intelligent Commerce Platform (Github) (Demo) December 2025

- Built an **AI-powered commerce platform** integrating **200+ products** from **2 external APIs** via automated ETL pipelines.
- Developed **15+ REST APIs** with JWT authentication, RBAC, server-side search, filtering, pagination and secure checkout.
- Engineered a **region-aware recommendation engine** using **4+ behavioral signals** to power **5+ personalized modules**.
- Optimized backend using **Redis caching, MongoDB indexing, asynchronous processing** and intelligent product ranking.

SKILLS

- **Computer Language:** CSS, HTML, JavaScript, Java, Python, TypeScript, Go
- **Frameworks & Libraries:** Tailwind CSS, Django, Next.js, Node.js, NumPy, Pandas, React Native, React
- **Databases & Data Tools:** MongoDB, MySQL, PostgreSQL, Supabase, Firebase
- **AI / ML:** Generative AI, RAG, Keras, LangChain, LangGraph, Natural Language Processing
- **Cloud & DevOps:** Docker, Git and Github, Linux, Kubernetes, Helm
- **APIs & Testing:** API, API testing, Postman, Distributed Systems, Jest

ACHIEVEMENTS

- **Semifinalist, Flipkart GRiD 8.0**: advanced to the semifinal round of Flipkart's national software development challenge.
- **LeetCode**: Solved **450+ problems** and achieved a **Contest Rating of 1558**, strengthening algorithmic problem-solving, optimization, and debugging skills.
- **Winner**: **Hack the Hunt:** Secured 1st place in a technical treasure hunt testing **Git, Linux, debugging, and problem-solving**.

EXTRA-CURRICULAR ACTIVITIES

OPEN SOURCE CONTRIBUTIONS

Apicurio Registry (Red Hat) | Java · Quarkus · Kafka **(5 Merged PRs)** July 2026 – Present

- Fixed contract rulesets and audit logs that **skipped the Kafka journal**, so they **never replicated** across registry nodes.
- Moved contract events into the **storage layer** as **replay-safe journal messages**, so every node publishes and applies them.
- Fixed embedded schemas extracted **only on an artifact's first version**, and shipped **new Java tests** with every merged PR.

OpenEverest | Go · Kubernetes · TypeScript **(5 Merged PRs)** July 2026 – Present

- Fixed an **auth bug** where failed token-blocklist writes **reported success**, leaving revoked access tokens valid until expiry.
- Fixed a **Kubernetes controller** reporting **ready before its cache synced**, making it wait for informer sync, with tests.
- Fixed a **plugin version check that never ran**, so the UI **blocks incompatible plugins**, with unit tests for edge cases.
