PROFESSIONAL SUMMARY

Results-driven developer focused on building scalable web applications with strong expertise in full-stack development, data structures, and problem-solving. Solved 400+ LeetCode problems and built real-world projects through hackathons. Passionate about writing clean, efficient code and continuously improving algorithmic thinking and system design skills.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School Of Technology, Rishihood University	Grade: 7.0/10.0
Intermediate (Class XII)	2022 - 2023
Montfort Academy	Grade: 73.2%
Matriculation (Class X)	2020 - 2021
Saint Joseph's School	Grade: 85.6%

PROJECTS

StaySync ([Github](#)) ([Demo](#)) December 2025

- Engineered StaySync with a scalable modular architecture and real-time workflow automation, enabling seamless hostel operations for students, administrators, and security staff through a unified digital platform.
- Developed a full-stack application using Next.js, Node.js, Express.js, and MongoDB with JWT authentication and RBAC. Integrated complaint management, QR-based gate pass, Razorpay payments, room allocation, analytics dashboard, and automated notifications.
- The project resulted in a production-ready Smart Hostel/PG Management System that digitized hostel operations and reduced manual work by 85%. It strengthened my understanding of full-stack development, authentication, payment integration, caching, and scalable system design.

QuickKart ([Github](#)) ([Demo](#)) November 2025

- Designed QuickKart as a modern e-commerce platform focused on delivering a fast, intuitive, and secure shopping experience with seamless product discovery, smart cart management, and scalable order processing.
- Developed a full-stack application using Next.js, Express, and MongoDB, implementing RESTful APIs for product management, order processing, and role-based admin controls with Prisma ORM. Integrated secure authentication.
- The project resulted in a production-ready e-commerce platform with efficient cart management and a scalable backend. It strengthened my understanding of full-stack development, API design, authentication, and database optimization.

SKILLS

Computer Language: CSS, HTML, JavaScript, Python, TypeScript, Java

Databases & Data Tools: MongoDB, MySQL, PostgreSQL, Supabase

AI / ML: Generative AI, Hugging Face, RAG

APIs & Testing: API

Cloud & DevOps: Docker, Git and Github

Domain & Business Skills: Figma

Frameworks & Libraries: Django, Next.js, Node.js, NumPy, Pandas, Prisma ORM, React, Tailwind

EXTRA-CURRICULAR ACTIVITIES

- Winner of **Hack the Hunt**, a coding-based treasure hunt. (GitHub, terminal commands, and problem-solving strategies.)
- Active member of the Coding Club, participating in coding contests, peer learning sessions, and technical discussions.
